WORK EXPERIENCE & PROJECTS

**Front End Developer** | CMS Laurentides  
September 2023 - October 2023

- Led the complete redesign and development of the company's website, enhancing its visual appeal and user experience.
- Ensured cross-browser compatibility and responsiveness on various devices and screen sizes, improving accessibility for a wider audience.
- Implemented technologies and frameworks, such as HTML5, CSS3, and react.js, to create an interactive and user-friendly website.

**Portfolio** | Personal Project  
August 2023- now

- Designed a React web portfolio showcasing my most recent works and projects.
- Researched creative and interactive approach to create an engaging online experience.
- Ensured cross-browser compatibility and responsiveness on various devices and screen sizes, improving accessibility for a wider audience.

**Full Stack Final Project** | Concordia University  
July 2023

- Delivered a website where the users could monitor the water levels of their home plants.
- Implemented technologies and frameworks, such as HTML5, CSS3 and React.js, to create an interactive and user-friendly website.
- Managed data and user identification using MongoDB and Node.js.
- Used git version control to manage my repository

**E-commerce Group Project** | Concordia University  
June 2023

- Led the design and front-end development of an e-commerce group project.
- Managed tasks distribution to ensure our team would meet requirements and deadlines.
- Developed and communicated with a group, using git version control to manage branches/repository.
- Commented and optimized my code to make it clean and understandable for my team.
